Hi Terry...

Dr. Fitzgibbons was actually already deleted from Cogenix during my last "Soft Delete" that I had Dana complete through Michelle Corrao at Cogenix. All of my Area Managers received this list and thus this served as their correspondence concerning this matter.

Thank you for keeping on top of this and other issues...we appreciate your support.

Take care...

Michael

Michael,

Let's go ahead and remove Dr. Fitzgibbon from our speaker's bureau and can you please inform your region and the other MDMs that you are doing this and the reason why. Also, please cc me on this correspondence.

Joan: Moving forward, let's not include Dr. Fitzgibbon as a speaker for any of our future programs.

Best,

Terrence Terifay

Hi Terry...

PLAINTIFFS TRIAL  
EXHIBIT  
**P-08064\_00001**

Sorry for the delay in response to this email.

I agree with the below information. I have heard Dr. Fitzgibbon speak and it wasn't very effective and he didn't speak highly of Actiq. I would recommend we don't use him too much in the future. We can touch base live in you'd like more info.

Good to see you in Vancouver...talk to you soon.

Michael

Joan,

I agree with you regarding Dr. Fitzgibbon, but I think we should get some more feedback before we officially remove him from our Speakers Bureau.

Michael: Can you provide me feedback on the quality of speaker Dr. Fitzgibbon is? So far, I have not received any positive feedback regarding his programs.

Thanks,  
Terry

Good Morning Terry,

Also, given the feedback we have received from Jamie Grosse do you think we should just remove Dr. Fitzgibbon from the speaker panel which will mean he won't be invited back to attend any faculty trainings or receive faculty updates. If he doesn't believe in the use of short acting opioids for the treatment of non cancer pain I don't know that he is one of the best experts to be using.

We have canceled him from the two upcoming dates where he was originally confirmed and he has no other dates.
